

Tubex Fruitwrap

The **Tubex** Fruitwrap has been designed as a low cost option for protecting small, woody stemmed fruit and olive trees. The **Tubex** Fruitwrap provides protection against animal browsing and herbicide spraying.

The **Tubex** Fruitwrap is a twin-walled shelter that has been split vertically, producing a natural overlap. This product can be neatly wrapped around a small whip plant and will expand as the plant grows.

Ideally suited for slender plants that have a dominant single stem, where the shelter can simply be dropped over the tree and supported with a sturdy cane.

more detailed specification over page

Hints and tips

- ▶ Use a firm cane to soil depth of at least 30cm.
- ▶ For exceptionally windy or exposed conditions, minor abrasion may occur around the top of the shelter - consider an alternative such as a **Tubex** Spiral or **Tubex** Ecostart.
- ▶ Visit www.tubex.com for advice on choice and use of Tubex products.

Quick specifications

- ▶ Heights 0.4m, 0.6m, 0.75m or 0.9m
- ▶ Diameters 65mm expanding to 85mm
- ▶ Nests 2 tubex
- ▶ Bundles 150 tubex
- ▶ Colour Tubex Translucent Green

Tubex 
Advancing growth

Tubex Fruitwrap with twin-wall construction, manufactured from environmentally harmless polypropylene, for protection against rabbits and herbicide damage.

Material composition

- ▶ UV stabilised polypropylene, harmless to the environment (No PVC!)

Standard sizes

- ▶ Heights: 0.4m, 0.6m, 0.75m & 0.9m
- ▶ Diameters: 65mm expanding to 80mm, nested in pairs

Colours

- ▶ Tubex translucent green

Special Features

- ▶ Quick and easy to both install and remove
- ▶ Overlap that expands as the plant grows

Durability

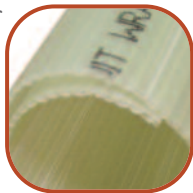

- ▶ Durable twin-wall construction for the best possible strength-to-weight ratio
- ▶ UV stabilised to provide a minimum estimated life of 3 years (can vary beyond this depending on site conditions)

Applications

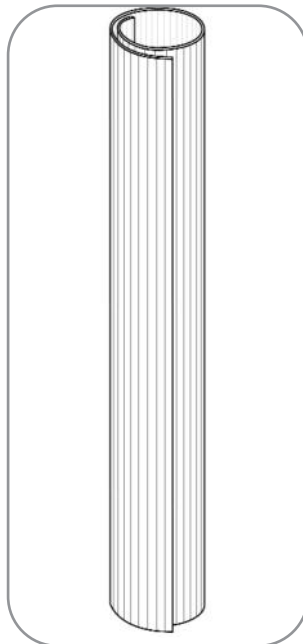

- ▶ Ideally suited to hedging, landscaping or fruit and olive tree applications
- ▶ Provides accelerated growth, improved survival rates and reliable browsing and herbicide protection
- ▶ A cost effective alternative to traditional rabbit fencing

Features

Split tubular construction

Twin-wall tubular construction

Made from environmentally acceptable polypropylene
