

Tubex Netguard

The **Tubex** Netguard is a mesh net offering effective protection against animal browsing. Made from resilient, high density, polyethylene, the **Tubex** Netguard is selected for its performance and environmental acceptability.

The **Tubex** Netguard is supplied in pre-cut pieces that can be formed around the tree and fastened using Tubex releasable ties.

Tubex recommends the use of two Tubex releasable ties for the attachment of the guard to a stake, as well as a smaller ratchet tie for closing the rim.

The **Tubex** Netguard can easily be installed around larger trees or shrubs, unlike some pre-formed nets, which have to be installed over the top of the plant.

A tree guard (net) does not provide growth benefits of a treeshelter or offer protection from herbicides.

Hints and tips

- ▶ Provided in pre-cut form or complete rolls, both of which require more installation time than a solid tubex shelter
- ▶ For growth benefits and herbicide protection consider a Tubex treeshelter - such as the **Tubex** Standard
- ▶ Use a well-driven quality stake to a soil depth of at least 30cm (possibly deeper in cultivated soil)
- ▶ Visit www.tubex.com for advice on choice and use of Tubex products.

Quick specifications

- ▶ Heights 0.6m or 1.2m
- ▶ Diameters 100mm or 250mm
- ▶ Bundles Flat packed pre-cut or in rolls
- ▶ Colour Dark Green
- ▶ Ties 2 x 10" plus 1 x 8"

Tubex 
Advancing growth

Tubex Netguard pre-cut mesh made from resilient high-density environmentally harmless polyethylene in dark green for resilient, low visibility plant protection.

Material composition

- ▶ High-density polyethylene - selected for its performance and environmental acceptability

Standard sizes

- ▶ Heights: 0.6m or 1.2m
- ▶ Diameters: 100mm or 250mm

Colours

- ▶ Dark green for low visibility protection

Special Features

- ▶ Pre-cut sheets for ease of application - can be cut to customer’s required size for special or large orders

Durability

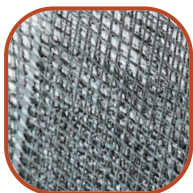

- ▶ Tough mesh construction

Applications

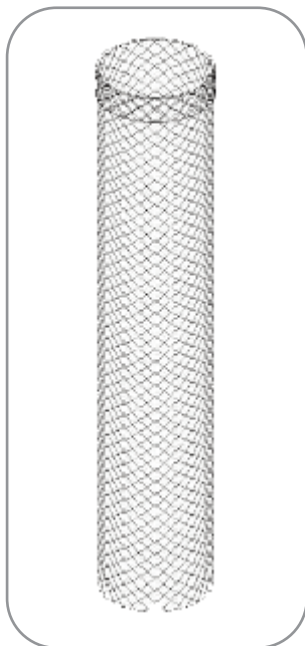

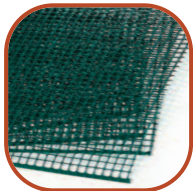

- ▶ Suitable for a wide range of planting stock and most site conditions
- ▶ Allow more time for installation than for Tubex treeshelters
- ▶ Use Tubex releasable ratchet ties for ease of installation
- ▶ Provides an excellent deterrent against animals and provides minimal visual impact.
- ▶ For growth benefits and/or herbicide protection consider using Tubex twin-walled construction treeshelters

Features

Resilient, unobtrusive mesh nets

Flat packed for easy transport and storage

Made from environmentally acceptable polyethylene

Releasable ratchet ties available
