

Tubex Plantation

The **Tubex** Plantation is designed as an economy option and is provided flat-packed for easy transportation and storage. As its name suggests, it is designed for those larger planting jobs. Under the 'MaxProtect' brand the Plantation product can be provided with an iron stake insert which acts as an anchor to the ground and trellis, whilst keeping the shelter in shape after installation.

The **Tubex** Plantation and 'MaxProtect' provide very cost effective options when considering large, multiple use requirements. The **Tubex** Plantation provides an improved growing environment resulting in stronger early growth, higher survival rates and a stronger leader with fewer side shoots. The **Tubex** Plantation also provides protection against accidental herbicide drift and damage from mechanical weeding.

Hints and tips

- ▶ Use 'MaxProtect' staking mechanism to save cost and retain shape
- ▶ Insert into ground to retain cylindrical shape.
- ▶ Mound soil around the base of the shelter to prevent upward air flow.
- ▶ Option of re-use to provide greater economy.
- ▶ Visit www.tubex.com for advice on choice and use of Tubex products.

Quick specifications

- ▶ Heights 0.4
- ▶ Diameters 90mm
- ▶ Nests 10 tubex
- ▶ Bundles 100 tubex
- ▶ Colour Tubex Translucent White

Tubex 
Advancing growth

Tubex Plantation with twin-wall tubular construction, manufactured from environmentally harmless polypropylene, flat packed for easy storage and transportation.

Material composition

- ▶ UV stabilised polypropylene, harmless to the environment

Standard sizes

- ▶ Heights: 0.4m
- ▶ Diameters: 90mm nested in 10 to facilitate easy transportation and storage

Colours

- ▶ Specially blended Tubex translucent white

Special Features

- ▶ Flat packed for easy transportation and handling

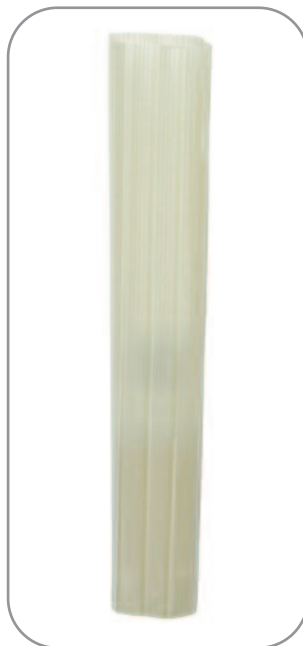

Durability

- ▶ Solid barrier provides reliable herbicide protection
- ▶ Durable twin-wall construction for the best possible strength-to-weight ratio
- ▶ UV Stabilised to provide an estimated life of 3 years (can vary depending on site conditions)

Applications

- ▶ Suitable for a wide range of vines and most site conditions to provide accelerated growth, improved survival rates and reliable herbicide protection
- ▶ Lower cost option for larger plantations
- ▶ Efficient packaging for transportation and storage

Features

Made from environmentally acceptable polypropylene
