

Tubex Shrubshelter Plus

The **Tubex Shrubshelter Plus** range is a strong, wider diameter treeshelter, providing all the benefits of the Tubex Treeshelter, but designed to accommodate very large, multi-stemmed planting stock.

Tubex Shrubshelter Plus is the largest diameter product currently manufactured by Tubex and will give improved survival rates by protecting plants from hares, rabbits and voles. The **Tubex Shrubshelter Plus** is mainly used for landscaping projects with mixed planting stock. For aesthetic reasons, the speedy removal of shelters from plants at the end of the establishment period is often a requirement for landscaping projects, and the **Tubex Shrubshelter Plus** is quick and easy to remove - unlike spiral or net products which can become embedded in the branches and bark of growing shrubs.

Hints and tips

- ▶ The **Tubex Shrubshelter Plus** needs to be well anchored using a quality square stake, with soil depth of at least 30cm.
- ▶ For smaller planting stock consider a **Tubex Shrubshelter**.
- ▶ Using the shelter's natural strength, push the shelter into the ground to remove gaps at the base.
- ▶ Visit www.tubex.com for advice on choice and use of Tubex products.

Quick specifications

- | | | | |
|-----------|--------------|-------------|----------------|
| ▶ Heights | 0.6m & 0.75m | ▶ Diameters | 144mm to 200mm |

Tubex 
Advancing growth

Tubex Shrubshelter Plus with twin-wall tubular construction, manufactured from environmentally harmless polypropylene, with abrasion-reducing flared rim and pre-fitted releasable ratchet ties.

Material composition

- ▶ UV stabilised polypropylene, harmless to the environment
- ▶ Two nylon ratchet ties per shelter

Standard sizes

- ▶ Heights: 0.6m & 0.75m (tolerance +0-15mm)
- ▶ Diameters: nested in 5 diameters 144mm, 158mm, 172mm, 186mm & 200mm

Colours

- ▶ Specially blended green

Special Features

- ▶ Flared rim to minimise stem abrasion
- ▶ Pre-fitted, releasable ratchet ties for ease of installation

Durability

- ▶ Durable twin-wall construction for the best possible strength-to-weight ratio
- ▶ UV stabilised to provide an estimated lifespan of 5-7 years (can vary beyond this range depending on site conditions)

Applications

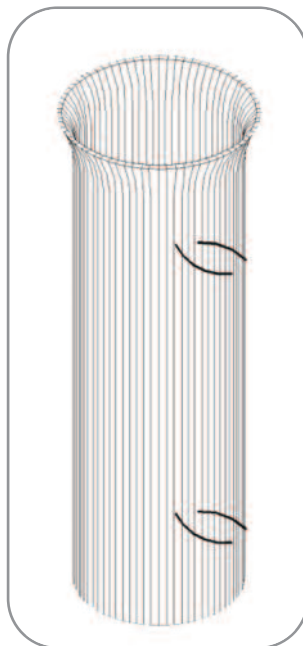

- ▶ Suitable for large and multi stemmed planting stock and most site conditions
- ▶ Favours landscaping projects with mixed planting stock

Features

Flared rim to help reduce abrasion

Twin-wall tubular construction

Made from environmentally acceptable polypropylene

Prefitted, releasable ratchet tie/s
