

Mesh range for shrubs

TUBEX Mesh range for shrubs are a wider diameter guard often used for larger bushier plants, where the guard is required to blend subtly into the natural environment.

TUBEX Mesh range for shrubs are available in two forms. Shelterguard for shrubs incorporates all the benefits of the shelterguard technology where the shrub can benefit from enhanced growth for the first initial period, then acclimatise to the outside environment through the two stage degradation process. Treeguard for shrubs are suitable on sites where herbicides are not used, and shrubs need plant protection. Both options provide reliable protection, blend into the natural environment and are manufactured with a thicker reinforced top edge to reduce stem abrasion. TUBEX Mesh range for shrubs is designed to last a minimum of 7 years*, boosting the chances of survival and healthy growth through the early stages of the plant's life.

*shelter longevity is dependent on site and weather conditions but is typically 7 years plus.

PRODUCTS	SHRUBSHELTER MESH RANGE	
Heights (m)	0.6	0.6
Diameter (mm)	130 - 160	144 - 200
Nest	4	4
Bundles	60	48
Colour	Olive Green	Olive Green
Ties	2 x 10"	2 x 10"
Support	Stake	Stake

- Shelter longevity is dependent on site and weather conditions and can vary considerably.

Overview of our product range

TUBEX shelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of trees.

Features of shelters:

 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>Twin wall construction for rigidity and best strength to weight ratio</p>	 <p>UV stabilised polypropylene to provide minimum 5 year protection</p>
 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Optional extras include punched holes for ventilation</p>	 <p>Renewable material source and greater flexibility over degradation</p>

Features of mesh range:

 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>UV stabilised and made from recycled plastic to provide minimum 7 year protection</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Weld line and flared rim splits avoiding strangulation as plant grows</p>	

- Shelter longevity is dependent on site and weather conditions and can vary considerably.
