

Rolls, cut pieces and layflat

TUBEX rolls, cut pieces and layflat are suitable alternatives to the mesh guards giving flexibility for the plant species and site conditions.

TUBEX rolls are available in the Treeguard and Shelterguard options, allowing you to cut to size on site. Once sheets are cut, use a stake, staple gun or ties to install.

PRODUCT	MESH SIZE (mm)	COLOUR	HEIGHT (m)	Length (m)	SUPPORT
Treeguard	12 x 12	Green	0.3, 0.45, 0.6, 1.2	50	Stake
Shelterguard	12 x 12	Green	0.3, 0.45, 0.6	50	Stake

TUBEX cut pieces are available in the Treeguard and Shelterguard options, eliminating the hassle of cutting the sheets onsite. Use a stake, staple gun or ties to install.

PRODUCT	HEIGHT (m)	DIAMETER (cm)	COLOUR	SUPPORT
Shelterguard & Treeguard cut pieces	0.6	9	Green	Stake
	0.6	14	Green	Stake
	0.6	20	Green	Stake
	1.2	20	Green	Stake

TUBEX layflat mesh is available in a fine mesh or standard mesh, can be stored flat and formed into a tube shape before installation. Layflat is to be secured using two forms of support.

PRODUCT	HEIGHT (m)	DIAMETER (cm)	COLOUR	SUPPORT
Standard Mesh	0.6, 1.2	15, 20	Green	2 x canes or stake & cane

ANCORFIX

Ancorfix is a rubber tie for staking or securing. It is suitable for many applications as it is strong, has high elasticity allowing the tie to expand, and lasts up to 2 years. Ancorfix is easy to install by simply wrapping the product around the surface area and pulling it through itself and around the 'anchor' part of the product.

- Shelter longevity is dependent on site and weather conditions and can vary considerably.

Overview of our product range

TUBEX shelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of trees.

Features of shelters:

 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>Twin wall construction for rigidity and best strength to weight ratio</p>	 <p>UV stabilised polypropylene to provide minimum 5 year protection</p>
 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Optional extras include punched holes for ventilation</p>	 <p>Renewable material source and greater flexibility over degradation</p>

Features of mesh range:

 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>UV stabilised and made from recycled plastic to provide minimum 7 year protection</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Weld line and flared rim splits avoiding strangulation as plant grows</p>	

- Shelter longevity is dependent on site and weather conditions and can vary considerably.
