

# Shelterguard

Our most popular mesh shelter, the TUBEX Shelterguard provides reliable plant protection, enhances growth as well as being designed to blend subtly into the natural environment.

TUBEX Shelterguard is designed to last a minimum of 7 years\*, boosting the chances of survival and healthy growth through the early stages of the tree's life. TUBEX Shelterguard is unique as it is designed to gain the benefits of enhanced growth through the microclimate of a treeshelter, but also allows the tree to acclimatise to the outside environment through its two-staged degradation process.

Welded to the 12mm square mesh is a very fine polythene film which starts to degrade after approx. 3 growing seasons, gradually exposing the tree to the outside environment allowing 'wind rock' to strengthen both root and stem as well as hardening the bark of the tree.

\*shelter longevity is dependent on site and weather conditions but is typically 7 years plus.

PRODUCTS	SHELTERGUARD	
Heights (m)	0.6, 0.75, 0.9	1.2, 1.5, 1.8
Diameter (mm)	80 - 110	80 - 110
Nest	4	4
Bundles	100	60
Colour	Olive Green	Olive Green
Ties	1 x 9" on 0.6m 2 x 9" on 0.75m	2 x 9" on 0.75m & 0.9m
Support	Stake	Stake

- Shelter longevity is dependent on site and weather conditions and can vary considerably.

# Overview of our product range

TUBEX shelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of trees.

## Features of shelters:

 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>Twin wall construction for rigidity and best strength to weight ratio</p>	 <p>UV stabilised polypropylene to provide minimum 5 year protection</p>
 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Optional extras include punched holes for ventilation</p>	 <p>Renewable material source and greater flexibility over degradation</p>

## Features of mesh range:

 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>UV stabilised and made from recycled plastic to provide minimum 7 year protection</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Weld line and flared rim splits avoiding strangulation as plant grows</p>	<ul style="list-style-type: none"><li>Shelter longevity is dependent on site and weather conditions and can vary considerably.</li></ul>
