

Shelterguard

Our most popular mesh shelter, the TUBEX Shelterguard provides reliable plant protection, enhances growth as well as being designed to blend subtly into the natural environment.

A unique product, the TUBEX Shelterguard is designed to gain the benefits of enhanced growth through the microclimate, but also allows the plant to acclimatise to the outside environment through its two-staged degradation process.

Welded to the 12mm square mesh is a very fine polythene film which starts to degrade after approx. 3 growing seasons, gradually exposing the plant to the outside environment allowing the bark to harden.

*Vinehelter longevity is dependent on site and weather conditions but is typically 7 years plus

PRODUCTS	SHELTERGUARD
Heights (m)	0.6
Diameter (mm)	80 – 110
Nest	4
Bundles	100
Colour	Olive Green
Ties	1 x 9"
Support	Cane or Stake

- Shelter longevity is dependent on site and weather conditions and can vary considerably.

Overview of Vineshelters

TUBEX vineshelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of vines and fruit trees.

Features of vineshelters:

 <p>Laserline, designed to split avoiding strangulation as plant grows</p>	 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>Twin wall construction for rigidity and best strength to weight ratio</p>	 <p>UV stabilised polypropylene to provide minimum 2 year protection</p>
 <p>Top holes, allows attachment to trellis wire</p>	 <p>Wrap splits vertically, expanding as tree grows</p>	 <p>Strengthening rods at stake area to prevent tearing of the vineshelter</p>

Features of mesh range:

 <p>Pre fitted thumb releasable ties for quick, easy installation and maintenance</p>	 <p>UV stabilised and made from recycled plastic to provide minimum 7 year protection</p>	 <p>Flared rim to minimise stem abrasion</p>
 <p>Nested for ease of transport and storage, whilst maintaining original shape</p>	 <p>Weld line and flared rim splits avoiding strangulation as plant grows</p>	

- Shelter longevity is dependent on site and weather conditions and can vary considerably.
