

## SHRUBSHELTER RANGE

**Tubex Shrubshelter range is a wider diameter shelter, which provides enhanced growth and reliable plant protection to larger bushier plants.**

Tubex Shrubshelter range is designed to last a minimum of 5 years\*, boosting the chances of survival and healthy growth through the early stages of the plant's life. Tubex Shrubshelters are ideally suited to landscaping projects with mixed planting stock. Shrubshelters are quick and easy to install and remove, also coming in a wider diameter Shrubshelter Plus.

\*shelter longevity is dependent on site and weather conditions but is typically 5-7 years

# Overview of shelters

Tubex shelters have been specially designed to provide the right solution for your planting needs. Over the years we have developed unique features that all contribute to the effective establishment of trees.

## Features of shelters:

Laserline, designed to split avoiding strangulation as plant grows

Nested for ease of transport and storage, whilst maintaining original shape

Flared rim to minimise stem abrasion

Pre fitted thumb releasable ties for quick, easy installation and maintenance

Twin wall construction for rigidity and best strength to weight ratio

UV stabilised polypropylene to provide minimum 5 year protection

Strengthening rods at stake area to prevent tearing of the shelter

Optional extras include punched holes for ventilation

Available in Bio-Hybrid

## Features of mesh range:

Pre fitted thumb releasable ties for quick, easy installation and maintenance

UV stabilised and made from recycled plastic to provide minimum 7 year protection

Flared rim to minimise stem abrasion

Nested for ease of transport and storage, whilst maintaining original shape

Weld line and flared rim splits avoiding strangulation as plant grows

Available in Oxo-Bio
